

Who is DBS?

DBS is a leading hardware and software provider for companies in the Delaware, Maryland, New Jersey, New York, Washington DC, Virginia and South Eastern Pennsylvania areas.

We have a customer base of almost 2000 active, satisfied clients and have been in business for over 20 years.

The majority of our customers are restaurant point-of-sale (POS) users. We are the largest dealer in the U.S. for ***Digital Dining***, a leading POS software package. We are also a top dealer for ***Maitre'D*** and ***Catapult*** POS software.

DBS is a “total systems solution” partner with our clients. We provide the training, configuration, installation, support, and consulting needs of our customers.

DBS is a debt free company that has grown steadily since its beginning. We have over 50 full-time employees. The company is not as dependant upon the economy’s ups and downs like other major companies and has never had to layoff employees due to economic reasons.

We are an energetic company that is team focused. Each member of DBS can rely on anyone within the company to provide support if required.

Technicians at DBS are cross-trained in many areas including: PC repair, networking, cabling, software support, and phone support.

Regular business hours are 8:30am to 5:00pm, but we provide emergency support as needed. We install and service accounts daily and local travel is required generally within a 3 hour radius of Wilmington, Delaware.

The thorough application process is designed to ensure that the best candidates are selected for the DBS team.

We thank you for your interest and look forward to speaking with you soon!
